Press Release

The ICCP is pleased to announce that the Statistical Training Institute (STI) from Statistics Center Abu Dhabi (SCAD) a department of the government of Abu Dhabi has become an ICCP Board Member. STI also becomes our business partner offering ICCP online courses, customized training, and credentials via objective examinations in the GCC region: Bahrain, Kuwait, Oman, Saudi Arabia, Qatar, UAE, & Yemen.

Dr. Bradley Jensen and His Excellency Mahmoud Fikri signing the Board Membership and Business Partner agreement.

During this visit Dr. Kewal Dhariwal (Executive Director, ICCP) and Dr. Bradley Jensen (President, ICCP) were able to conduct an onsite, in-person training and certification preparation Boot Camp with 'Mock Exams'. Many UAE government employees were able to pass the ICCP exams and are well on their way to the Certified Data Professional (See page 2 for details) designation, which is rated one of the top 15 most desirable credentials by CIO magazine.

We welcome Ms. Rabaa Baniyas, Director, STI to the ICCP Board of Directors as the STI-SCAD representative. This relationship will allow ICCP and STI to create new customized certifications for the region as well as offer training throughout UAE government departments. In addition, ICCP will assist the UAE to become a leader in the world of data accuracy, data quality and data integration across all government departments, by assisting departments to follow Generally Accepted Data Management Principles (GADMP) and an 'integration first' versus 'integration last' policy for any new applications development.
